

## MVK tensioning tool for plastic strap

### Product information

The plastic strapping tensioning tools are suitable for tensioning, locking and cutting 13 and 16 mm PET and PP strapping. The locking method is a metal lock which the tool tightens around the strap. Tightening, locking and unlocking are all done with a single handle. Suitable for light to medium duty applications and in environments where there is a fire hazard. The machine is quick and easy to use and is the optimum choice for a wide range of applications where manual strapping is required.

**Features:** Strap thickness 0,4 - 1,0 mm

**Material:** Steel
