

Terastross Dyform 34LR

Tootekirjeldus

Väga madala keerduvusega kraanatross.

Võrreldes semi rotation resistant trossidega väga hea vastupidavus paindeväsimusele.

Kompaktitud keed tagavad kõrge muljumis- ja kulumiskindluse töötamisel mitmekihilistel trumlitel.

Väiksem venimine on saavutatud tänu kõrgkvaliteetsele terasele ja DYFORM tehnoloogiale.

Standard: EN 12385-4: 2002

Trossi konstruktsioon: Rotation resistant

Märgistus: Vastavalt standardile, CE-tähisega

Pinnakate: Tsingitud või kirgas.

Standard: EN 12385-4

Täitefaktor: 0.76

RCN: 23-2
